DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-3 and 5-7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The subject matter not described in the application as filed is, in claims 1 and 7, that directed towards a second corrector correcting feed based on the state of the reaction detected by said first reaction state detector "and an amount of said oxidation gas corrected by said first corrector" and, in claims 2 and 5, "third reaction state detectors". Applicant has added the previously described subject matter by amendment. Since such subject matter was not described or conveyed in the application as filed, doubt is raised as to possession of the claimed invention at the time of filing.

The examiner makes note that if applicant were to delete the above identified new matter from the claims, the rejection of claims as presented in Paper No. 6 would continue to apply.

Response to Arguments

Specification

The objection to the specification is withdrawn due to applicant's cancellation of claim 4.

Drawings

The objection to the drawings is withdrawn due to applicant's cancellation of claim 4.

35 USC 112

The rejection of claim 4 under 35 USC 112, first paragraph is now moot since the claim has been cancelled by applicant.

The rejection of claims 2 and 5 under 35 USC 112, second paragraph is withdrawn due to applicant's amendment to the claims.

35 USC 103

Applicant's arguments are directed toward the failings of Shinohara with respect to the claims as presently amended. Though the examiner agrees that Shinohara fails to demonstrate a second corrector correcting feed based on the state of the reaction detected by said first reaction state detector and an amount of said oxidation gas corrected by said first corrector, a rejection under 35 USC 112 first paragraph regarding such subject matter has been made above since no support for this amendment has been found in the specification.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
